Login

Register

**SCHOOLS THAT DO NOT HAVE THE IPhCO CODE** First Enrollment Teachers who will enroll for the first time.

### Procedure 1

Click on: **Register**

Enter the requested data: Name and email.

### Procedure 2

Check your email, as you will receive a message asking you to continue your registration. Click on the submitted link. A new window will open where you can enter your ID Number and create a password to access your area on the IPhCO Platform.

### Procedure 3

Click on: **Login** and access the Teacher's Area by entering the registered email and password (6 digits). Enter the details of your school (or schools) in case you teach at more than one institution, and save your entry. Then you have to wait until the school is approved.

Once the school is approved, it will be possible to enroll students. Each student entered by the teacher will receive, an email with a link so that he can supplement his data and create the password to access the Student Area.

The teacher must instruct the students enrolled by him, to complement their data, as soon as they receive the message from IPhCO.

Important information such as the School's IPhCO Code (lowercase "s" plus a three-digit number, eg, s347) and the Portal passwords can be viewed by the student, directly in this area.

In case of any problem, doubt or difficulty with the Platform, please contact the Olympiad Committee: [iphco@ifpr.edu.br](mailto:iphco@ifpr.edu.br).

**SCHOOLS THAT ALREADY HAVE THE IPhCO CODE** Teachers who have participated in IPhCO in previous years.

Just go straight to Procedure 3. Enter your (most recent) registered email address at IPhCO and use the temporary password sent to you by the Olympiad Committee. As soon as you enter your area, change the password immediately. Create a new six-digit password. Complete your personal data, check and update the data of the registered school(s). And if you want, start enrolling your students!
